

## Sr. Software Engineers, Roku Digital Video Player

### ABOUT ROKU

How would you like to be part of the team that created "the most impressive product attached to a TV this decade"? Do you want to work at the place that "revolutionized the way entertainment is delivered"? Would you like work on the product that the New York Times called "better than any other"?

The Roku digital video player (also known as the Netflix Player by Roku) enables you to instantly stream high quality movies from Netflix and Amazon Video On Demand, over the Internet directly to your TV and has received overwhelmingly positive reviews in The Wall Street Journal, CNET, WIRED, and elsewhere.

### THE ROLE

We are looking for experienced **SENIOR SOFTWARE ENGINEERS** to join Roku's digital video player development team. The ideal candidates must have a proven track record of designing, building and delivering high-quality software for consumer electronics products and experienced at bringing leading edge audio/video and networking solutions to market based on solid engineering practices.

We are currently looking for user interface and middleware engineers who want to be a part of a team building the best connected media player for the TV. Members of our team use modern C++ to develop custom high performance UI components for our platform. Applications are built using a light-weight scripting language.

You will have the opportunity to work with key partners to bring valued content and new features to our customers.

### YOU MUST HAVE:

- A passion for consumer electronics.
- 8+ years of relevant software development experience.
- Seasoned C++ programmer with the ability to solve complex problems.
- Attention to detail and the ability to write simple, elegant and engaging User Interfaces.
- Strong understanding of application framework models (like QT).
- Ability to accurately estimate software tasks and work to schedule.
- Bachelors or Masters in Computer Science or equivalent engineering experience.

### YOU MAY ALSO HAVE:

- Strong experience with QT (under the hood knowledge highly desirable).
- Solid background in networking technologies, protocols and performance analysis.
- Experience in developing RESTful web services applications with HTTP/XML.
- Experience with Webkit integration and customizations.
- In-depth understanding of Linux, tools, libraries and open source development.
- Detailed understanding of video streaming, CODEC's and internet video formats.

### CHARACTERISTICS OF SUCCESS AT ROKU

- Self motivation.
- Positive attitude.
- Customer focused.
- Individual contribution combined with team orientation.
- Leadership by example.
- Ability to execute on overall business goals in personal area.
- Desire to win in a highly competitive environment.
