

# Senior Web QA Engineer

## The Company

Would you like to be part of the team that created “the most impressive product attached to a TV this decade”? Do you want to work at the place that “revolutionized the way entertainment is delivered”? Would you like work on the product that the New York Times called “better than any other”?

Roku’s innovative and best-selling digital video player is just the beginning. Roku is delivering on the future by bringing the promise of Internet-delivered media into the living room today.

For more information, visit [www.roku.com](http://www.roku.com).

## The Role

We are seeking a senior QA engineer responsible for testing all aspects of Roku’s websites, shopping pages, channel store interface, and server/database backend supporting these features. The ideal candidate must have a thorough grasp of testing methodologies and be experienced in all aspects of the software development cycle including test planning, test execution, black-box and white-box testing, troubleshooting and reporting. As a key member of Roku’s software engineering team this person must be a highly motivated individual with excellent communication skills.

## The Responsibilities

- Test various web pages including secure e-commerce pages
- Test accounts and billing features requiring server/database backend support
- Test internal reporting system
- Manage a process to test compatibility with various operating systems
- Test compatibility with various browsers
- Verify applicable changes on Roku’s networked, digital video products
- Troubleshoot issues to find the root cause
- Report defects and project status to team members (development, marketing and network operations)
- Lead bug triage meetings and manage all project issues within a bug tracking system

## The Requirements

- 5+ years in software engineering
- Must have experience testing web and e-commerce systems
- Must have experience testing various browsers including IE, Firefox, Chrome, and Safari
- Must have experience testing various operating systems including Windows, Mac and mobile devices
- Familiarity with HTML, Flash, Java script, cookies
- Independent problem solving, self-direction and multi-tasking ability

Roku, based in Saratoga, CA, is venture-backed, with investors including Menlo Ventures and Netflix, Inc.

- Ability and motivation to learn quickly and with minimal support and guidance
- Excellent verbal and written communications
- BS, BE or equivalent
